Bradford

Frame/Mullion

Product Specifications

- Available in all foil selections, except Group E (gloss).
- Outside profile on all shakers is B111.
- Raw doors with melamine back are available but are not warranted against warp. Bradford is not available raw. No styles are available with raw back.
- 3/4" MDF with white melamine back is standard. Matching melamine backs are available for select woodgrains for an additional charge. See Foil Reference Chart at the end of the Product Guide for availability.
- Fingerpulls are available for an additional charge.
- A one square foot minimum charge will apply to each piece with an inside route.
- Standard grain direction: Vertical for doors, frames & mullions, horizontal for drawer fronts.
- The following grid outlines the minimum and maximum dimensions for Shaker doors, frames and mullions using standard stile and rail dimensions shown above. Stile and rail dimensions can be altered for an engineering fee.
- Drawer front height will determine the options for full rail or slab styles. Shaker fronts do not have a reduced rail option. The rail height will always be 2". The standard center panel is 4" but will vary for drawer fronts with heights more than 8" or from 6" to 8". Drawer fronts with heights less than 6" must be slab or slab with vertical lines on Lancaster, Lancaster Elite and Country Shaker.
